

PolySaw2700/110

Hydraulically operated pipe saw specifically produced for the preparation of pipe segments in PE, PP and other thermoplastic materials, used for the production of bends, tees and other fabrications. Capacity 1200mm to 2700mm / 48" to 110". Cutting angle up to 67.5 degrees. Lowering rate of saw is hydraulically controlled. Low-profile construction for safe operation.

TECHNICAL SPECIFICATIONS

Cutting range 1200 to 2700mm OD / 48 to 110"

Low profile design

45 degree maximum cutting angle allows production of segments for bends, tees and Y-branch tees

Angular cutting error equal to or less than 1 degree

Genuine 24 month international warranty

Saw blade 20*0.9*16800 (subject to change upon final design)

380/415 volt 3 phase 50 Hz. Optional 480 volt 3 phase 60 Hz
